

COLD ROOM SPEED DOOR

For Fast Speed & Freezing Use Only / Color Customization Available

FROST-PROOF HEATING WIRE

INSULATION LAYER

PRODUCT BRIEF

Cold Room Speed Door is a high-speed insulated door designed for low-temperature environments. It features an insulated curtain, heated side tracks, and tight sealing to reduce temperature loss and prevent frost. With fast operation and reliable insulation, it improves workflow efficiency and energy control in cold storage and food-processing areas.

TECHNICAL PARAMETERS

ITEM	SPECIFICATION
Insulation Curtain	Multi-Layer Thermal Curtain
Max Size	Up To 4.5m × 5.0m
Opening Speed	Up To 1.5 m/s
Motor Type	Low-Temperature Industrial Motor
Control System	Brand VFD or Servo
Side Tracks	Heated Tracks To Prevent Frost
Working Temperature	-5°C / -18°C / -25°C
