

MECHANICAL DOCK LEVELER

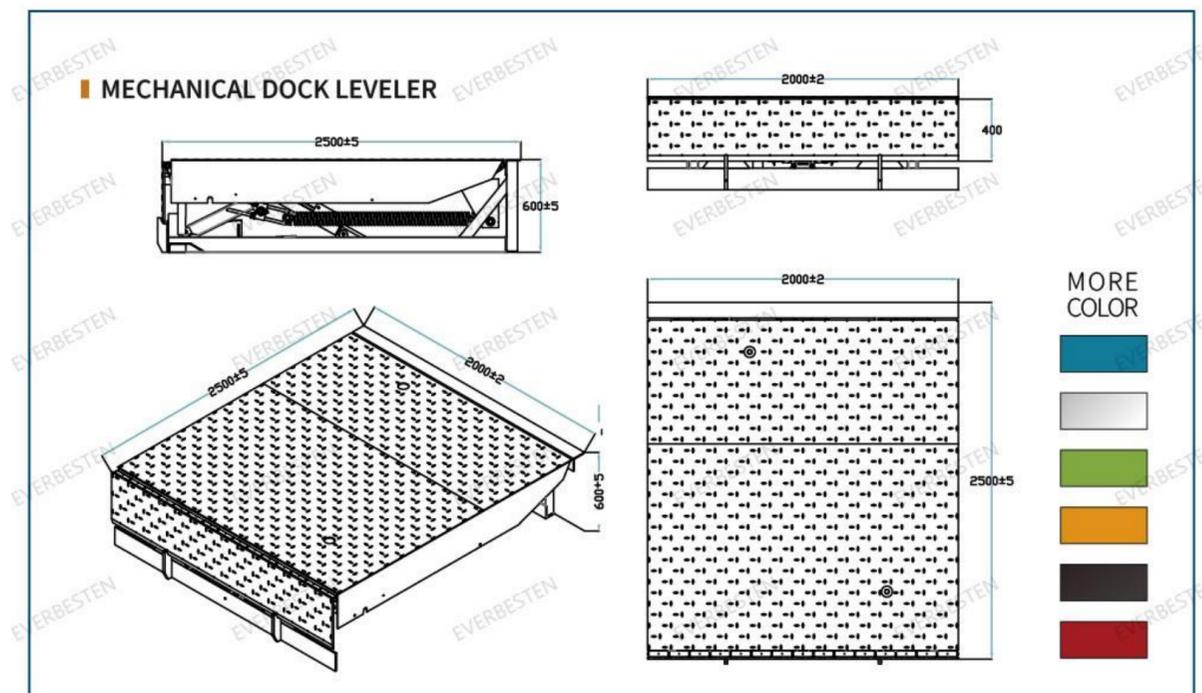

Easy Cleaning / Color Customization Available

TECHNICAL PARAMETERS

ITEM	SPECIFICATION
Main Beam	Reinforced Channel Beam Structure
Capacity	4,000–15,000 Kg(Statics Capacity)
Surface Treatment	Powder Coating / Anti-corrosion Finish
Lifting Method	Manual Pull Chain + Spring-assisted System
No Power Required	Zero Energy Consumption
Safety Features	Toe Guard & Maintenance Prop
Optional	Hot-Dip Galvanized/Chock/Weather Seal/Dock Light

DRAWING

PRODUCT BRIEF

Mechanical Dock Leveler is a manually operated loading solution designed to create a safe and efficient bridge between the dock and the truck bed. It uses a spring-assisted lifting system, offering stable performance without electrical power. Ideal for warehouses, logistics centers, and facilities seeking a cost-effective and low-maintenance dock solution.
