

MOBILE DOCK RAMP

Adjustable Height To Match Various Truck Heights

PRODUCT BRIEF

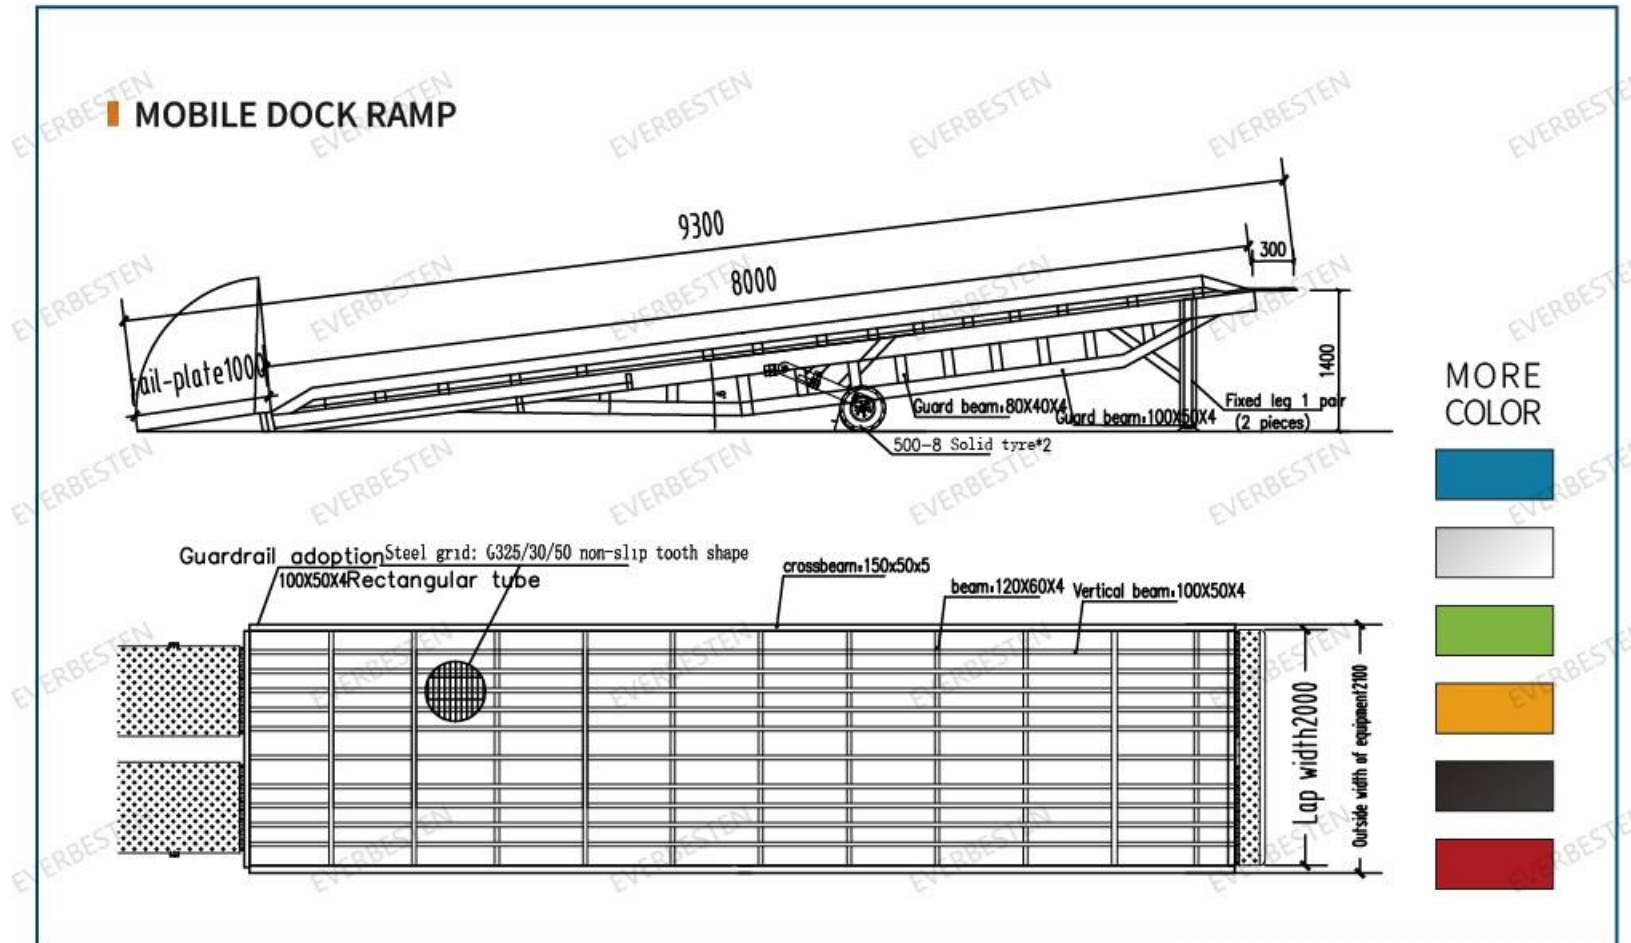

Dock Ramp enables forklifts to enter trucks or containers directly from ground level without a fixed loading dock. It features hydraulic height adjustment to match different vehicle bed heights and ensure safe operation. The reinforced steel structure and anti-slip platform support heavy forklift loads and high-frequency use. Designed with wheels and safety chains, it is ideal for yards, warehouses, and temporary loading areas.

TECHNICAL PARAMETERS

ITEM	SPECIFICATION
Material	Heavy-Duty Anti-Slip Checker Steel Plate
Hydraulic Pump	4Manual / Electric
Safety Features	Side Rails / Anti-Slip Surface / Safety Chains
Load Capacity	Up To 20 Tons
Advantage	Hot-Dip Galvanizing For Corrosion Resistance
Options	Extended Length For Long Vehicles
